

# **Watershed Governance for the Botanical Garden Section (Nakao River) in the Upper Reaches of the Zhupai River in Nanning City**

(22-MAY-2020)

---

## **Overview of PPP project**

The Project of Watershed Governance for the Botanical Garden Section (Nakao River) in the Upper Reaches of the Zhupai River in Nanning City is a newly-built project, in the sector of ecological construction and environmental protection - comprehensive treatment, which is at the stage of implementation currently, with the Nanning Urban River Management Office as the implementing agency.

The bid winner is Beijing Drainage Group Co., Ltd. The project starts from the planned eastern part of the Maoqiao Lake in the south, through the Hunan-Guangxi Railway, Changgang Road, Xiangzhu Avenue, Medicinal Botanical Garden and Kunlun Avenue, and ends at the Ring Expressway in the north, with a total length of about 6.6 kilometers.

Project delivery includes the river regulation, pollution interception, ecological protection of river course, river bank landscape, sewage plant construction, sponge city and information monitoring.
